Resumo	This study aimed to study the relations between character and social support, through the Characters Strengths Scale (EFC) and Social Support Scale - EPSUS-IJ (Youth version). 293 adolescents, 14 to 17 years (M=14.95, SD= 3.038) participated, 67.8% female. Results showed that the factor 1 (Contributing to Problems) EPSUS-IJ contributed significantly to explain 21 characters strengths. The second factor (Social Interaction) presented significant coefficients in 14 strengths, and factor 3 (Aff ectivity) in 12 strengths. The fi ndings are discussed based on literature.
